## **DETAILED ACTION**

### ***Specification***

The abstract of the disclosure is objected to because the expression "3 Claims, 4 Drawing Figures" at the end should be deleted. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 1-3** are rejected under 35 U.S.C. 102(b) as being anticipated by Young, III (US Patent No. 5,174,564).

Young discloses a golf swing structure (see Fig. 2) comprising a fixing element (combination of 66, 68, 70, and 72), clips (75, 80), hanging belt (combination of 54, 56, 74, and 76). Please note that the clips as shown on Fig. 2 are V-shaped. Regarding the intended use set forth in the claims, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

**Claims 1 and 2** are rejected under 35 U.S.C. 102(b) as being anticipated by Calabrese (US Patent No. 4,456,249).

Calabrese discloses a structure (see Fig. 1) comprising a fixing element (7), clips (4,5), hanging belt (combination of 1-3). Regarding the intended use set forth in the claims, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

**Claims 1 and 2** are rejected under 35 U.S.C. 102(b) as being anticipated by Poscente (US Patent No. 6,126,554).

Poscente discloses a structure (see Fig. 2) comprising a fixing element (24), clips (16,18), hanging belt (the shoulder strap as shown on Fig. 2). Regarding the intended use set forth in the claims, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.
